ACTIONS

With ambitious plans to consider adding a mezzanine level to increase the number of start-up companies it can support, Peterborough Workspace Ltd is looking to change from traditional lights to LED to save energy and cut costs. Following a site visit from Business Energy Efficiency, Peterborough Workspace will be following recommendations to replace traditional fittings with LED lights.

RESULTS

Changing the light fittings to LED will enable a predicted energy consumption reduction of 38,790 kWh per year, which in turn will create an estimated carbon reduction of 16 tonnes CO₂e and achieve savings of £4,300 per year.

£4,300	16 TONNES

"The service offered a valuable insight into understanding our energy consumption as well as highlighting savings and efficiencies. The whole process from initial contact, site visit and report – with recommendations – was made effortless and easy by the BEECP team." - **James O'Rawe, General Manager**
